

Solo Clock

Phase 1,2,&3

Art 101 - Sravya.D

Slide 1 - List of Activities

15-20 Items =

- Morning routine (brush and drink water)
- Exercise
- Career plan
- Self Care
- Dressing
- Socializing (go to college - engage with students)
- Work Schedule (assignments)
- Digital Screen time
- Family Time
- Walk
- Listen to Music
- Meal preparation
- Listen to News
- Read Quotes
- Sleep
- Youtube
- Spend time with family friends (weekend)

Activities with Time

Monday - Sunday =

6am to 8am - Good Morning! Wake Up!

8am to 9am - Breakfast time, fresh up and get ready for college!

9am to 10am - Attend the online/in person class!

10am to 11am - Time to add your to-do list for today and this week!

11am to 12pm - Take a Break/Listen to Music while working on assignments

12pm to 1pm - Eat and Watch = Lunch Time - Open Youtube

1pm to 3pm - Time to take Break if needed while working

5pm to 6pm - Snack time - have nuts = Work Mode On and time to work on Blender

6pm to 7pm - Prep time - Time to Cook & Eat Dinner

7pm to 8pm - Check Canvas and work time - Drink Smoothie!

8pm to 9pm - Spend time with family

9pm to 10pm - Indoor Walk for 30 mins after work is completed

10pm to 6pm - Bed Time - Don't forget to wash your face before going to bed!

Sketch 1

One of my concepts involves using a cookie theme, divided into three sections that loop over time. The number of dots on the cookie will indicate the total count of minutes and hours. Seconds (expands the size of circle based on seconds it started from)

Sketch 2

Description:

Another idea - Based on the water drop theme, divided into three segments: seconds, minutes, and hours. Each drop represents a second, and after 59 seconds, a minute is recorded in the glass. As minutes accumulate, they contribute to the total hours.

Visualization Clock - Project 3

Phase 2 - Solo Project Rough Draft

For Exercise 5, I designed a visual clock that illustrates my daily activities from 6 AM to 10 PM, capturing how I organize my time throughout the day. I incorporated seconds, minutes, and hours to match my daily routine and included activities that reflect my typical schedule. The clock also features a day and time mode, with water as the central concept. I built on the water drop theme, dividing it into three sections: seconds, minutes, and hours. Each drop represents one second, gradually filling a glass container with water. After 59 seconds, the water is recorded as a minute in a bottle. As the minutes accumulate, they contribute to the total hours stored in a larger container. I also included my activities within specific hourly segments, each reflecting the daily routine I follow.

Seconds, minutes, and hour

Phase 3 - Final setup - days, time and activities!

Solo Clock - Day and Night time

Tuesday

Time to add your to-do list for today and this week!

Thursday

Prep time - Time to Cook & Eat Dinner!

Wednesday

Eat and Watch - Lunch Time - Open Youtube!

Friday

Spend time with family
